

Good Practices in VMware Virtual Desktop Infrastructure Design

| | |
|--------------------------|--|
| Session Details | |
| Session ID: | VD2584 |
| Session Title: | Good Practices in VMware Virtual Desktop Infrastructure Design |
| Session Abstract: | During this two hour technical deep dive customers and partners alike will learn the secrets, pitfalls, and best practices used when planning and designing enterprise VDI solutions. They'll learn the same methodology VMware Professional Services consultants use when engaging with customers in the field. |
| Track: | |
| Session Type: | Technical Overview Session |
| Keywords: | Networking; Storage / Backup; VMware Infrastructure; Virtualization Platform / Hypervisor |
| Duration: | 1 Hour |
| Speaker(s): | John Dodge(VMware,Inc.) |
| Speaker 1: | John Dodge, VCP, MCSE, CCNA, Project +, joined VMware in January 2008 through the Foedus acquisition, where he was a Principal and Managing Partner. Presently John is responsible for developing intellectual property and new service offerings for VMware's Enterprise Desktop solutions, with specific focus on VMware ThinApp and Virtual Desktop Infrastructure. John has over twenty years experience in IT infrastructure design, implementation, and management, and began designing and implementing VMware based solutions in |

2002. John is a regular speaker at many VMware and partner events.
