You have the option to embed a YouTube video into your posting by either of these methods::

1)

Copy the "embed" code which you will find next to any video you view on www.youtube.com -- and [paste that code into a discussion](#) under the "Plain Text" tab.

2)

Insert the URL of the YouTube video between 2 custom youtube bracket tags as shown here:

` YouTube URL ` (Note: take out all the spaces) For example, the following YouTube video has the URL of <http://www.youtube.com/watch?v=p11JOnALS4>. If you insert this URL between the tags shown above, you will get: [<http://www.youtube.com/watch?v=p11JOnALS4>]
