

Where's the Fusion Team?

[Mike Nelson](#) 1 posts since

May 1, 2008

The Fusion product has become a big part of our mac users experience at my company. It's disappointing to only see a Lab for Fusion and no breakouts. 😞

Where are you Team Fusion?

The self-paced VMware Fusion lab at VMworld 2008 will cover a whole range of users, but if you have any specific features or topics you wish to see for future events or online course/service offerings, please provide your feedback here and we will pass this on to the Fusion team.

Here are some details for the upcoming lab:

Install VMware Fusion

Explore the VMware Fusion Interface

Where's the Fusion Team?

Create a Windows XP Virtual Machine

Take a Snapshot / Snapshot Management

Run Windows Application on the Mac desktop using Unity (and how it works with Spaces and Expose)

Explore Hardware device pass-through by using the built in iSight web cam

(Addendum/Advanced) Running OSX in a VM

(Addendum/Advance) Configuring Fusion for multiple virtual networks
