Jun 23, 2008

The VMWorld 2008 Conference - has met my high expectations in which I thank the VMWare staff and it's sponsors for doing such an excellent job on hosting it at The Venetian Hotel in Las Vegas. I gained valuable information and resourceful information on the Self paced labs, Instructor paced labs, Virtual Booths, Vendor Booths and the Genius sections. Everything has open my awareness, that VMWare is the technology of the future!

For those of you who are new to VMWare Products, I recommend it to anyone! Whether you are a PC or MAC user, VMWare accommodates products for the end user to save time and money. The products I learned were VMWare Workstation 6.5, ACE, Fusion, Converter, and Lab Manager 3.0 All of these are going to be benefit private and educational institutions for many generations to come.

Sincerely,

Larry Valenzuela

VMWorld 2008 Conference - Awesome...

May 12, 2008 1. **Re: VMWorld 2008 Conference - Awesome Experience!** :-) Sep 18, 2008 3:24 PM

I completely agree. Everything from the sessions and solutions exchange to the food and entertainment were great. Being new to VMWare, I learned a lot of things this week, and I'm excited to go back to the office next week and play around.

VMWare has set the bar pretty high for next year, and I hope I'm able to make it, and see if they can deliver again. I may not have paid with my own money, but I certainly feel I got my moneys worth. Thanks for a great week VMWare, and all of the sponsors. You've made my first trip to Vegas both informative and entertaining!
