

Getting started with Vmware...

Allisen Waage 1 posts since

Sep 19, 2008

First timer here. Have been hearing lots of good stuff about the consolidated backup system. I So we thought we would check it out. We are currently using Veritas backup exec, I think it's version 11.xx. I found a few white papers. Anyone have any real world advice for a first timer? We have a Xiotech SAN and 4 ESX servers.

Thanks!

Allisen
