Dear All,

Would like to know as to when the PPT Presentation and docs of this Vmworld 2008 available on this site.

Need to share with internal teams on the learnings from this event and also need the same for further reference.

VMworld 2008 Sessions & Labs will be made available online by the end of September. All paid attendees of VMworld 2008 will be able to view flash videos (audio over slides) of the breakout sessions from the VMworld 2008 conference. PDFs will be available for download for all lab manuals and presentations.

VMWORLD 2008 CONTENTS

Will you proactively notify us with a link to their location or will we have to remember to look for them then hunt them down?

Thanks...

I'm a user like you, you are going to have to be proactive. I am not going to manage this thread.
