Aug 28, 2008

Has anybody seen this lab posted? I attended the lab but wanted to pass it on to some people at work. It was Lab03 in the Palazzo room M - VMWare Site Recovery Manager - Installing, Configuring and Troubleshooting

Hi Jason,

I also attended this lab and I was advised that the material will be available to download at the end of September.

I saw on the site yesterday that they are posting information on October 3. So, maybe one more day?
