

VMPlayer error message - need help!

[Larry Valenzuela](#) 6 posts since

I created a Team in VMware Workstation 6.0 which was a Windows XP and Windows Vista and tried opening it on VMPlayer. I get an error message that states "Error while opening the virtual machine: The virtual machine is a member of a Team", does this mean that I can't upload VM Teams on VMPlayer or can I only upload one VM on VMPlayer at a time?

Any advice is greatly appreciated...
