

VMware Training DVD by Elias Khnaser

Various vendors (DataCore, Veeam, VizionCore) were giving the VMware Training DVD away at their booth. When I try to run it, it tries to go to Elias Khnaser website and then doesn't work. Did the vendors basically scam us in giving us a good-for-nothing DVD? Is there any way to get the training classes to actually work?

Hi,

VMware Training DVD by Elias Khnaser

The vendors have nothing to do with this. We had a problem with manufacturing and a slip sheet was missing that had the license information. please email me: elias@eliaskhnaser.com

Thanks,

Elias Khnaser
