Sep 10, 2007

After three successful meetings in 2005, 2006 and 2007, the Dutch VMware User Group announced it's time for a fourth one! They would like to invite you to attend the 2008 VMware User Group Event on the 12th of December at the Nieuwegein business centre, The Netherlands. With over 3100 members this year's event will become massive. Join the Dutch VMUG and learn best the practices and optimal use of VMware products, get answers, advice, tips, and suggestions from experts, discover new ideas and gain insight about Virtual Infrastructure, receive special information about new VMware products, network with other technical professionals and be part of the leading edge of VMware users.

The Dutch VMUG event attracts a lot of attention. In September 2005, the first time this event was held the number of attendees was around 50. This number has risen over the years. The next event will take place on the 12th of December and is open for registration. The Dutch VMUG expects around 600 attendees. It looks like the Dutch VMUG has become some sort of mini VMworld.

Update : The registration page went online last week and close to 170 attendees already have signed up for the Dutch VMUG event.
