

VDI Performance tuning-What have you...

[Chris Hartmann](#) 1 posts since

Jul 15, 2008

I am setting up a training room using VDI, VDM and ThinApp for 12 desktops as our pilot for VDI and I would like to know what other people have done for performance tuning on the VDI desktop.

Thank You

Chris Hartmann

What are you using on the desktop for emulation PCs or Wyse?

VDI Performance tuning-What have you...

I think the two most important areas are whats on the desktop and your back end. Each of our desktops are given 512m super-users upto a gig. Make sure you give them the right network card LSI.

For finer details check VMware best Practice guides
