**Q: What VMware products are available through the VMware Store?**

**A:**

VMware Virtual Infrastructure, VMware Workstation, VMware ACE, VMware

Server and Support and Subscription services for these products may be [purchased](#) directly on our Web site. [VMware Server](#) and [VMware Player](#) are free product downloads available at any time. All other VMware products are available by contacting VMware Sales or [authorized resellers](#).

**Q:**

**Can I swap or upgrade from a VMware Workstation for Windows Operating Systems license to a VMware Workstation for Linux systems license or vice versa?**

**A:** No. Both products

provide the same powerful features, but each is specifically designed for the operating system on which it runs. It is not possible to "swap" or "transfer" licenses across platforms in an upgrade.

**Q: Will I be charged Sales Tax or VAT?**

**A:** VMware is required to charge Sales Tax and VAT to customers as follows:

United States Customers: VMware is required to charge tax to customers residing in each of the 46 states that impose a sales tax. Sales tax is applicable on all taxable orders; including those placed online. Please note that electronically downloaded software is taxable in most states.

European Union Customers: VMware is required to charge Irish VAT of 21% on all sales to customers residing in the European Union. If you are a VAT registered customer, please populate the VAT Registration Number field with your VAT registration number in order for VAT to not appear on the invoice (please note that this does not apply to VAT registered customers located in Ireland).
