

Is there any product of vmware for...

Ashish 4

2008-12-9

Hi all,

I am new in this forum.

I am using ubuntu linux as my desktop, in that can i use vmware ?

Any help will thankful.

Is there any product of vmware for...

Regards,

Ashish Barot.

The best place to start would probably be with VMware Workstation 6.5 which runs on Ubuntu.

VMware Server 2.0 supports the following Ubuntu versions:

- Ubuntu Linux 8.04

Is there any product of vmware for...

- Ubuntu Linux 7.10
- Ubuntu Linux 7.04
- Ubuntu Linux 6.10
- Ubuntu Linux 6.06

VMware Server 1.0.x supports the following Ubuntu versions:

- Ubuntu Linux 5.04 and 5.10
- Ubuntu Linux 6.06 (experimental support)

VMware Workstation 6.5 & Player 2.5 support the following versions:

- Ubuntu LTS 8.04
- Ubuntu Linux 7.10
- Ubuntu Linux 7.04
- Ubuntu Linux 6.10
- Ubuntu Linux 6.06
- Ubuntu Linux 5.10
- Ubuntu Linux 5.04

VMware Player can also be found in the canonical repositories.

For other versions of ubuntu you might have to do a few workarounds for getting VMware to play nicely:

<http://www.howtoforge.com/how-to-install-vmware-server-2-on-ubuntu-8.10>

<http://www.luisrocha.net/2008/10/installing-vmware-player-in-ubuntu.html>

There's a bug in 8.10 that will make the shift & control key's behave a bit strange (hang). You can work around that issue too:

<http://www.nalinmakar.com/2008/11/12/vmware-player-and-ubuntu-810-keyboard-mapping-issues/>
