As you can imagine, we are at full speed organizing the next VMworld Europe event in Cannes, France from February 24 - 26. Registrations are going well and many sponsors are signing up, which is really great as VMworld really is more than just sessions about VMware Solutions. We will have [100+ technology partners and virtualization vendors](#) and pretty much all the virtualization big shots will be there

To make sure we also will have a lot of content related to real world experiences we are looking for people in the real world to share your experiences with us all. If you are interested in presenting in Cannes next year, please have a look at our [call for participation](#). For more details about submitting a session, please read [this document](#).

Hope to see you all in Cannes

Richard,

I will be submitting a session abstract this weekend; I just registered for the event a few minutes ago. I spoke at VMWorld 2006 and won the Vanguard Award in 2007 for Best DR Design. It will be my first VMWorld Europe and I'm very excited! I also recently spoke at the, "Green Computing Summit" here in the USA. Let me know if there's anything I can do to help.

Cheers!

- Jason Langone
