I am researching on the monitoring features of vmware. I don't know its a correct place to question or not.

which security measure are taken for monitoring agents to connect with vmware?

what measures are taken to reduce Hypervisor monitoring overhead?

Monitoring Data can be represented in how many formats by default like Raw, XML or JSON etc ?

I will be very thankful for ur replies

Hi Asghar,

have a look at this link and see if it helps.

http://www.vmware.com/pdf/vi3_security_hardening_wp.pdf
