

All new VMworld Europe 2009 content?

Erik Scholten 22 posts since

I've browsed through the session & speaker catalog which was published recently and there are many sessions which seem so familiar. Sessions like *'Best Practice for Successfully Virtualizing Active Directory'* , *'VMware VMFS Deep Dive and Best Practices'* and *'Software Licensing in the Virtual Enterprise'* (which was a great session by Chris Wolf in 2008 btw) were all in the 2008 edition of VMworld Europe.

So are the VMworld Europe 2009 sessions and labs all new or are there some sessions and labs from 2008 which will be repeated?

If 2008 sessions and labs will be repeated, which sessions and labs are unchanged? So I can skip those.

I would hope that even if the topic was a repeat that the best practices themselves will have been refined over the year, and that there are many more tips and tricks.

All new VMworld Europe 2009 content?

I agree with you though... if it is the same material, unchanged, please note that.
