

Intel & VMware Demo - World's First...

Tai Nguyen 18

2008-2-13

Found this blurb with details on the clip...

New technologies are helping the enterprise to save time, money and energy, while eliminating downtime. When virtualization meets the data center, the savings can be profound. Intel's and VMware's "Flex Migration" allows VMware's VMotion to take advantage of all the hardware in the data center - from older generations to next generations.

Intel & VMware Demo - World's First...

Here's an Intel Whitepaper on the topic.

<http://communities.intel.com/docs/DOC-2013>

If you want more, info on how to use EVmotion or FlexMigration in the real world. Let me know.
