I'd love to have you attend 😊

Here are the details:

<p>Solution Overview</p> <p><i>1 Hour</i></p>	<p><div class="fontBold">DC31 - What's New In the Enterprise Cloud ?</div> <div class="fontNormal">Are</p> <p>cloud based services suitable for enterprise applications ? Will they</p> <p>deliver the SLA and security you need ? What usage cases and</p> <p>applications are most suitable for such</p>	<p><div class="fontBold">Deepak Puri</div>Director vCloud Business Development</p> <p>VMwar</p>
---	--	---

deployments ? How have other firms been able to control costs by extending their data center to incorporate cloud based resources ? Come hear from three industry leaders (Terremark, Atos Origin and Logica) about the cloud based services they are delivering to enterprises today with VMware technologies.</div>
