

2009 - State of the Datacenter:...

VMworld Team 132 posts since

Jun 12, 2008

We're about to enter an age of dynamic enterprise computing that will challenge IT organizations to find new ways of managing heterogeneous virtualization environments. At this tradeshow we will illustrate how virtualization will drive the next generation of enterprise computing. We'll also share tactics on how to cope with the rapidly changing requirements of the modern data center.
