Isn't it possible to dowload all the video's of the last europe conference. It would be nice if i can look at alle the session in the evening when the wife is looking at her favorite TV-program.

Thx.

There are ways around it to make it work but it against the policy to reproduce materials. You can stream it full screen and use Camtasia Studio 6 to capture it and then reproduce to flash video file which will be smaller in size but good quality that's one simple way.
