Hi Folks,

Can anyone tell how to migrate a cluster VM which is on shared storage (where HA & DRS) also supported?

Hi,

It's easy

Step 1

configure the VLAN vmotio

How to migrate a Cluster VM which is on...

Step 2

Select the VM and press right mouse button. Choose to migrate, further indications.

Regards.

How to migrate a Cluster VM which is on...

Hi,

Actually we are clustering the virtual machine with shared storage. but vmware is not supporting HA, DRS & Vmotion if we go for clustering between virtual machines with shared storage. so I need a solution how to resolve this case. Please assist.

Ok,

please, you send the screenshot of the licence on VirtualCenter. Only you can migrate VM with VC.

*Thank You*

Go to edit settings on VC cluster and create a rule(keep Virtual Machines together) under DRS, after you set the rule whenever DRS migrates these VM's. It migrates together.

Thanks

Vijay
