

New iBac VIP Pricing - \$0 to Backup...

Idealstor Guy 2 posts since

Feb 13, 2009

iBac Virtual Infrastructure Proxy for VMware ESX is now available for Free. Our host license option is now \$0 with support/upgrades available for \$295/host.

iBac VIP is an enterprise backup solution for VMware that ties into VMware Consolidated Backup (VCB). With iBac VIP you can backup all your VMs like you would with an enterprise backup solution. There is no cost per processor or VM. Scheduling, logging, email reporting, file level and full server restore and an easy to use GUI are all part of iBac VIP.

Please feel free to give our VMware backup software a try. The download link can be found at:
