You have less than two weeks to take advantage of your early bird discount-which can save you \$250 on registration. So don't miss out on your savings, or the opportunity to attend VMworld [\\*www.vmworld2009.com\\*](http://www.vmworld2009.com), the leading virtualization event dedicated to showcasing how virtualization is revolutionizing the next generation of IT.

With cutting edge hands-on labs, endless networking opportunities and more than 300 sessions, you'll gain actionable ideas for virtualizing your entire enterprise - from the desktop to the datacenter. This year you'll also learn more about **VMware vSphere 4** - the best platform to improve control of your IT infrastructure.

We know you value the education and training you get at VMworld. View the [\\*Content Catalog\\*](#), now available online, to learn more about the sessions, hands-on labs, and speakers that make VMworld the one event you must attend this year.
