

Outdated material

Ron Porter 7

2009/06/26

I see a lot of Dell posts that are almost a year old. Can someone purge the outdated ones please?

Thanks for your interest in Dell's virtual booth, we're working hard to continually enhance and update the materials/discussion posted here for VMworld 2009. Be sure to check out all of the latest items we've been posting over the past week and will continue to post next week during the show. If you're going to be there in person, please come by booth #1801 for a live demo or to meet with one of our consultants.

👤 : Andrew Gilman

I've removed the older documents that I created. I can't remove the one's that I did not create. Andrew, can you delete your old ones down in the document section ?

Outdated material

Thanks for pointing out, it is confusing with last years material intermixed with this years.
