Jun 5, 2009

While in the Self-Paced Labs several of us asked if we could get copies of the labs. We were told that they would be available online in about 2 weeks. I was wondering if someone could direct me to them.

Jeff,

The team is still working on some of the lab manuals hence the delay. If you tell me which ones you'd like, I'll ask the guys to let me have them right away and let you know when posted (too big to email).

looking forward,

Donato Pineda

Thanks for the quick reply.

What I'm asking for is the documentation that was used in the class on the right hand monitor. That should already be done.

SPL13 - VMware Infrastructure 3 to VMware vSphere 4 Upgrade

SPL15 - VMware View Base Install & Config

When should I check back.

Jeff

this should take no more than a couple of days! I just received SPL13. I should have the SPL15 by tomorrow and uploaded by tomorrow afternoon.
