VMware Shared Storage without the cost and complexity (Sponsored by <http://www.storagevirtualappliance.com/>)

- **STORAGE** allowing you to implement a high availability ESX environment with VMware HA or VMotion
- **VIRTUAL SAN** utilizes the internal disk drives of your ESX server
- **APPLIANCE** enables integrated management of datastores, SAN & RAID directly from vCenter

A Storage Virtual Appliance (SVA) unlocks the resources of the ESX server and provides a virtual SAN that enables datastores to be shared in the same way as an external shared storage system but without the hassle and expense. By using the internal disk drives of the ESX server to create a virtual SAN, SVAs provide a cost effective shared storage environment without having to install a complex external SAN. SVAs provide comparable performance to an external array with a similar number of disk drives.

Storage Virtual Appliances are quickly setting the trend with virtualization users that need resiliency and flexibility without significant costs. Don't be left behind! This informative webinar will discuss Storage Virtual Appliances and you'll hear from a user who was able to meet his business continuity requirements with a Storage Virtual Appliance.

Register for this Webinar NOW!

WHAT'S IN IT FOR YOU?

Attendees will be provided with a link at the end of the presentation enabling them to download a complimentary copy of a SVA!

YOUR PRESENTERS:

Joel Hurford - Principal (Mitsis LLC)

John McArthur - President of Walden Technology Partners and former Group Vice President and General Manager at IDC

Mike Stolz - VP of Marketing (StorMagic)

WHEN:

VMware Shared Storage Without the Cost...

- Thursday, October 29th at 11:30AM, EST - [Click here to register](#)

See you at the Webinar!

Regards,
