This year I attended for the first time vmworld europe and i was very pleased with the experience.

- The one thing I hope is that next year VMware finds a solution for the hands-on labs. Waiting for more than 3 hours to attend a hands-on lab was frustrating, because that way i missed some interesting sessions. Perhaps an extra day for the labs in combination on the partner day ??? Or more places available for the labs (if that's possible for the technician who installs everything).

- After attending VMworld I hoped that it was easy to download the session presentations or movies. The way we have to do it now is frustrating because you again had to watch all session. I would like to download all the presentations and movies easily so i can watch the movies and read the presentations when i have the time.

But, it was great!!!
