Aug 5, 2008 **Join us for a Webinar on January 21**

**Reserve your Webinar seat now** What are your plans for vSphere in 2010? As you evaluate the wide plethora of features that change your business with VMware, have you contemplated how vSphere ESX can help you with your Business Continuity initiatives? In fact, if you haven't given much thought to your Business Continuity plans for 2010, think again! A recent survey revealed that a staggering 93% of companies that suffer significant data loss are out of business in five years! According to VMware, Business Continuity tops customers' demand with 45 percent expressing that it is important for their organization. So where's the challenge?

While VMware presents you with many of the advanced features enabling business continuity, you still require the shared storage that unlocks those features.

Business Continuity plans will keep your organization up and running through interruptions but without the required shared storage, your organization is deprived of any of the features that enable this. Recently, StorMagic introduced the SvSAN for vSphere ESX, a virtual SAN that leverages the internal disks of your VMware server to give you shared storage. This smart technology prevents the need to invest in an expensive SAN or NAS and allows you to leverage advanced VMware features such as VMware HA, VMotion and DRS. The SvSAN also integrates directly into vCenter making it one of the easiest management tools on the market. In the process, you've taken the first step toward your Business Continuity initiatives.

As you begin 2010, it's time to implement your organization's Business Continuity strategy. The SvSAN removes the traditional cost and complexity barrier to give your business the protection it deserves. Join us for this informative webinar on January 21st, 2010 at 10:30AM CST discussing how to plan for your Business Continuity in 2010. You will learn about Business Continuity considerations and how the SvSAN can go to immediate work for your organization. In fact, why not get a kick start today and download our complimentary SvSAN HA Kit [here](#)

Why SvSAN HA Kit? 1.) Enable VMware HA, VMotion and DRS2.) Experience the benefits of an included Virtual SAN with HA3.) Continuous Access to Datastores4.) Get a head start on protecting your organization5.) Break free from the cost and complexity of external shared storage

6.) Maintain online applications and constant accessibility

What's included in your SvSAN HA Kit? SvSAN Virtual SAN, 30 Day HA License & Introductory SupportSuite
